PROJECT REPORT TEMPLATE

1 INTRODUCTION

1.1 OVERVIEW

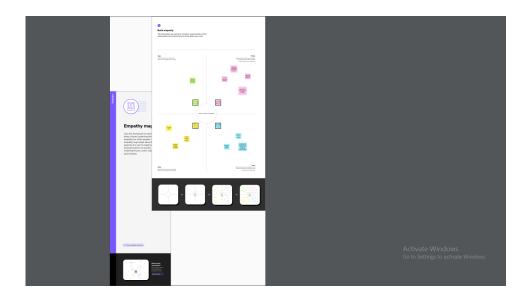

Develop an app for the property management where buyer can order his requirements and get the appropriate details of the property. According to his interest just provide him with some discounts upto what extent he can get the discount .Also track whether he is interested in taking the loan available for so just calculate how much loan amount user can get it. Provide the security for two different profiles like for marketing and sales team. Then finally create the reports and dashboard so there will be clear view just get the reports on the count of loan passed getting the property purchased.

1.2 PURPOSE

Running and maintaining a real estate property can be challenging for any commercial or residential property manager. Whether you rent one or multiple properties, dedicated property management software (PMS) can help you streamline your rental operations. Software solutions that can keep track of tenant information have been around for a long time ,but an increased focus on analytics and reducing overhead costs is making even reluctant property owners reconsider their decision to go digital

5 ADVANTAGES:

Centralized data management
Better tenant management
Streamlined data processes
Improved financial
management
Mobile access

DISADVANTAGES:

Cost

Complexity

Integration

Dependance on salesforce

6 APPLICATION:

The application of salesforce is vast and provide numerous benefits to real estate companies. salesforce can be used to automate various

property management processes, including lease management, rent collection, save time and money.

Salesforce may integrating data from sensors and other IOT devices to provide real time insights into

property performances and improve maintenance and management processes

7 CONCLUSION:

This app is all about the field study that we have conducted on our real estate management systems

to login insight into users of the product that we design. By having these top 5 futures as the foundation of a mission critical system addressing the demands and challenges of the real

estate industry, upward trend will continue, growth will be realized, and success will be inevitable.

8 FUTURE SCOPE:

The application and future scope of property management using salesforce are

vast and the platform has the potential to transform the way real estate companies manage their properties.
